***Are you interested in teaching others how to
protect groundwater and springs?***

Want to help protect Florida's groundwater? This training provides the knowledge and materials needed so more residents are able to educate others about springs protection.

Upon completion of the training, each participant will pledge to deliver at least one presentation before June 30 to a church group, civic organization or workplace.

All materials needed for your presentation will be provided. This program is focused on Marion County but can be adapted for use in other areas of Florida.

The program is limited to 18 participants, so register early.
